WAYPOINT® SOLAR LIGHTING

Waypoint® solar lighting is an energy-efficient, easy way to add illumination to your fence or railing. Our solar glass post caps and solar metal post caps do more than simply shed light on a project, they add an intimate glow and a dramatic accent. Our solar lighting products require no external wiring. They're available in a wide array of popular designs for use with four-inch and five-inch posts, and they're remarkably easy to install.

With Waypoint® solar lighting, you get a clean, stylish appearance and a level of innovation you simply can't find anywhere else. We've developed high efficiency solar circuitry so the lights remain illuminated longer. Our improved dual-LED bulbs provide greater illumination and a stronger accent. An angled reflector below the bulbs directs more light through our exclusive beveled-glass. Dual rechargeable batteries boost energy storage capacity to provide longer illumination time and battery replacement is simple—there's no need to remove the lights from the posts.

Solar Post Cap Options

GLASS TOPS (4" LIGHTS SHOWN)

- Stained - 4" or 5" - 3-1/2" adaptor is available for wood or metal post applications

SOLID TOPS (5" LIGHTS SHOWN)

- Metal Plated - Solid Colors - 4" or 5" - 3-1/2" adaptor is available for wood or metal post applications

***ALL LIGHTS SHOWN WITH BLACK OR WHITE FRAME BUT ARE AVAILABLE IN OTHER COLORS.**

Easy Battery & Solar Collector Replacement

Glass Top

The solar collector simply lifts up from the glass topper. No need to remove entire light. You will now have access to replace batteries and or solar collector as needed.

Metal Top / Natural Top

Run your finger under the edge of the cap and feel for the rough spot (A). Firmly pressing inward on one adjacent side of the housing, releases the peg (B) from the hole (C). (Lifting up). No need to remove the entire light. You will now have access to replace batteries or solar collector; spread tabs (D).

Process is the same no matter color or size of light.

Matching post caps and low voltage lighting caps are also available. When integrated with Waypoint® solar lighting, they offer an even higher level of design flexibility. It's that flexibility, plus the attractive styling and unrivaled quality, that make Waypoint® the industry's finest solar light offering.
